

Belt Driven Planetary

KR16GP and KR20GP

No matter how you "kut" it, the Kut-Rite Belt Driven Planetary Grinders are the most diverse floating planetary machines available. With more than 10 different preparation and/or restoration tools to choose from, they will bring new life to concrete surfaces, decks and hardwood floors. The KR16GP and KR20GP are aggressive enough to prepare the toughest of concrete surfaces without leaving gouges or deep swirl marks. This feature allows an inexperienced operator to prep and polish like a pro. Powerful enough for industrial jobs, yet light and simple enough for residential use.

Features & Benefits

Ideal for residential garage floor preparation with 120/220 volt operation.

Produces an even surface and eliminates surface gouging.

Excellent tool for polishing concrete and stone surfaces.

Remove old stains and high spots on wood decks and prepare hardwood floors from start to finish.

Equipped with safety trigger handle for safe operation. Removable handle for easy transport.

Equipped with exclusive tool mounting system. Change tools for different application in seconds.

Equipped with adjustable dust skirt and hose port for virtually dust free operation.
