

Kut-Rite

No matter how you *kut* it.

CONQUER *TWIN*

Conquer Twin Concrete Grinder

The Innovative Conquer Twin concept incorporates two passive planetary turntables with three abrasive drivers each. The turntables are positioned one behind the other (22" wide) or side by side (42" wide). The turntables counter-rotate and are synchronized with a gear system. The drivers and turntables are capable of rotating clockwise or counter clockwise and the machine incorporates three processing positions; 1) Planetary Mode, 2) Rotary Mode and 3) Hybrid Mode. The Conquer Twin grinding/polishing machine incorporates and combines two very different concepts into one unbelievable machine.

Features & Benefits

Planetary/Rotary/Hybrid Cutting capabilities.

Grinding heads can cut the floor surface 1/8" from the wall.

Grinding head is controlled by an linear actuator, giving the operator an easy, safe way of raising the head for tooling changes.

Magnetic based Tooling

The Conquer Twin is compatible with the Klean-Rite™ Vacuum Sytems.

Conquer Twin Concrete Grinder

CONQUER *TWIN*

PLANETARY CUT:
LARGE BOWLS SPIN IN ONE DIRECTION AS THE GRINDING HEADS ROTATE IN THE OPPOSITE DIRECTION.

ROTARY CUT:
LARGE BOWLS ARE LOCKED IN A FIXED POSITION KEEPING THE GRINDING HEADS FROM ROTATING IN ANY PLANETARY ROTATION.

HYBRID CUT:
LOCKING ONE BOWL INTO A ROTARY POSITION WHILE ALLOWING THE SECOND BOWL TO OPERATE IN A PLANETARY POSITION.

PATENT PENDING

Models	HP	Power Source	Power Specs	Weight	Tool Speed	Grinding Head Pressure
Conquer Twin	2x5HP	Electric	240v Dual Phase VFD	900lbs	200-1300RPM	825lbs
