

# KR34GR Rotary Polisher

No matter how you kut it, the KR34GR rotary polisher is transforming the polishing process! It incorporates three 12" independently driven high-speed polishing pads to cover a 34" swath and polishes up to an incredible 4,000 square feet of floor per hour per grit. This machine is designed for concrete polishing professionals who require high throughput, reliable durability and outstanding aesthetic results.

## Features & Benefits

Handle adjusts up and down for operator comfort.

Floating head allows machine to hover over contours of surface at high speed.

Incorporates a quick change tool system that enables diamond grit change in seconds.

Equipped with three powerful direct drive 5 HP electric motors.

"Flip up" head allows easy access to tool system and efficient mobility while not under power.

Integrated dust collector tows behind machine in front of operator eliminating hose management issues.

Superior high speed polish at a production rate unmatched by any process.

Ideal for extremely fast re-polish applications.

# KR34GR Rotary Polisher

Kut-Rite is proud to present the incredible KR34GR 34" high speed polisher. Equipped with three overlapping 12" quick release pad drivers, the KR34GR is changing the way large floors are polished. It is capable of producing more than 4000 square feet per hour per grit of extreme high gloss polished floor. The KR34GR can be equipped with the optional tow behind vacuum system that contains an extreme dust filter and three powerful 277 volt vacuum motors. Towing the vacuum system eliminates the cumbersome vacuum hose and leaves you with only a cable to maneuver. The machine is powered by three 5 HP 480 volt industrial motors that deliver 1800 rpm at maximum torque. Adding to the efficiency is the quick release pad drivers and the flip up head. Change diamond grits in seconds without any tools, hammers or tricks. The flip up head feature, combined with the oversize handle adds to the efficiency by allowing easy movement of the machine while not under power. The KR34GR is ideal for "re-polishing" floors from 400-1500 grit as well as taking over the floor after cutting it with a planetary machine such as our KR54GP. Consider the KR34GR for your next high production project and outperform the competition.

Models	HP	Power Source	Power Specs
KR34GR5	3 x 5HP	Electric	460v 3PH 1725RPM
