

KR54GP

Planetary Grinder

No matter how you kut it, the KR54GP is the largest walk behind planetary floor grinder/polisher available. Utilizing its exclusive patented design, the KR54GP uses 3 independently-driven power plants to grind and polish an industry leading 54" path. The exclusive patented design of the KR54 works to provide superior results with minimum effort while utilizing a wide variety of diamond and carbide abrasives to prepare concrete surfaces for a coating as well as bringing out the natural luster of a concrete floor during polishing applications.

Features & Benefits

Prepare extremely large floors for coating application.

Polish extremely large floors in record time.

Three independently driven planetary grinding heads.

Powered jack lifts heads for easy abrasive replacement.

Change tools for different applications in seconds.

More than 10 different preparation and/or resoration attachments.

Integrated dust collector tows behind machine in front of operator eliminating hose management issues.

Variable Frequency Drive (VFD) allows varied speed for different tool operation.
